# The Low Cost, High Quality Intraoral Camera

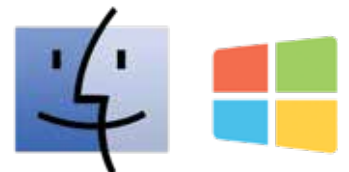

Perfect for Hygiene and Patient Education

The camera is easy to use and works with most imaging software. Unlike most inexpensive cameras which have a short life span, render a mediocre image, and whose capture button does not save an image in your software; the iCam performs admirably, delivering an excellent image, with its programmable capture button it is compatible with all major dental imaging software.

iCam works in all leading imaging software and can be used in conjunction with existing cameras.

COMPATIBLE WITH

# Your Practice Deserves To Purchase The *Right* Camera!

Let Our Team of Experts Help You Make the Best Choice
